

**over 90% of the web is  
inaccessible** to disabled people.

**we can do better.**

(and it's actually not too complicated!)

join the Digital Media Lab for a two-part

# accessible HTML/CSS

**workshop series!**

## <who/>

All levels of web/design experience are welcome! Even if you aren't a web designer, you'll learn things that apply to many modes of making (ex. InDesign, Canvas). Faculty as well as students are encouraged to attend!

## <what/>

We'll be covering some basics of semantic HTML (& why it's so important), some styling tips with CSS, and tools you can use to check your work. There will even be a demo HTML/CSS document to work through and take with you for future reference.

## <where/>

Digital Media Lab [Cathy 435]  
or remotely via Zoom

Desktops will be available at the lab, but feel free to bring your own laptop!

## <pre-register/>

Sign up with our form, so we can send you demo files (and a Zoom link if you're joining remotely) in advance!

**part 1: HTML**

Friday, 3/17, 2 - 3:30pm

**part 2: CSS**

Friday, 3/24, 2 - 3:30pm
